

We would like to invite you to attend an engaging *Traveling Road Show* information session for the Long-Term Care Homes **Ontario Healthcare Reporting Standards / Management Information Systems** (LTCH OHRs/MIS) project.

**Wednesday, October, 28th, from 8:30 - 12:30**  
**Helping Hands, Orillia**  
**126B - 210 Memorial Ave.**  
**Orillia ON L3V 7V1**

OHRs/MIS is an exciting initiative dedicated to providing the LTCH sector with **reliable means to collect and report OHRs/MIS compliant financial and statistical data**. During this session, project team members will be available to provide information, answer questions and prepare you for reporting OHRs/MIS. By doing so, you'll already have some of the required business processes in place when you sign-up for the project between now and 2012.

OHRs/MIS provides homes with a number of key benefits, including:

- **Access to useful, high quality standardized data**
- **An enhanced ability to track trends and benchmark with your peers**
- **A more efficient reporting process to meet accountability requirements**
- **An opportunity to demonstrate efficiencies in service delivery and to implement best practices in your operations and business policies.**

Two (2) individuals per home are welcome to attend. The session will be of particular interest to accountants, administrators or financial analysts - people involved in day-to-day financial reporting. To register, please contact our Support Centre at 1.866.909.5600 or complete the attached RSVP Form and email it to [OHRSLTCH.moh@ontario.ca](mailto:OHRSLTCH.moh@ontario.ca)

**ABOUT CCIM:**

The LTCH OHRs/MIS project is implemented by the Community Care Information Management (CCIM) program. CCIM provides seamlessly-integrated, community based client care where all service providers can securely share and access consistent and accurate information electronically. The LTCH OHRs/MIS is following similar methodology and implementation as our sister project LTCH Resident Assessment Instrument MDS 2.0 project.

We look forward to seeing you soon,

**The LTCH OHRs/MIS Project team**
